

FlexSEA

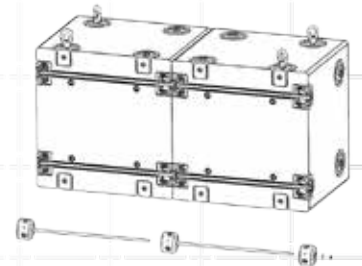

ROV Buoyancy Like Never Before

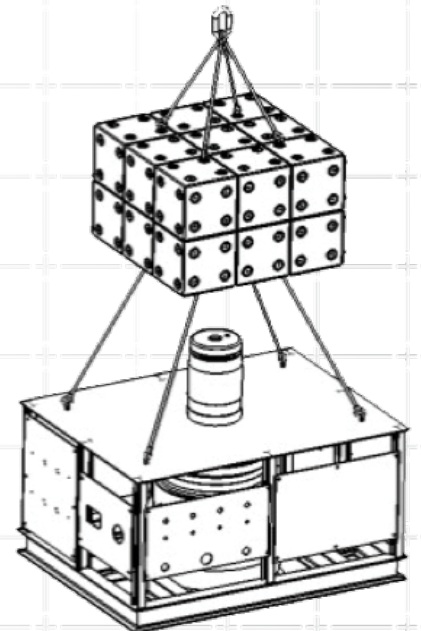

Introducing the FlexSEA™ Modular Flotation System available for rent exclusively from Okeanus Science & Technology. FlexSEA™ flotation modules are configurable to supply different amounts of buoyancy for a variety of payload sizes and weight conditions. Different sizes offer the option to form arrays for a wide variety of subsea modules, tools, instrumentation packages, vehicles and submersibles including ROV mounted intervention packages.

Detachable connection and positioning allow for a variety of geometries.

The connection hardware facilitate attachments to maintain structural integrity of the array.
